New And Exclusive at Sccube The Apothecary Day Spa

SAVE YOUR HANDS WITH THE LEGENDARY REVIVE GLOW – INTRODUCING REVIVE PEAU MAGNIFIQUE LES MAINS HAND TREATMENT

Now a powerful skin-transforming treatment for hands designed to slow visible signs of aging in four weeks or less.

Singapore, November 2013 - Inspired by the concept of “New skin, no trauma”, Dr. Brown created this targeted hand treatment, featuring a breakthrough bio-complex of key ingredients that mimic skin repair, without actually traumatizing the skin or causing downtime.

This powerful skin-transforming treatment helps slow the visible signs of aging with a blend of “youth-recruiting” ingredients that provide dramatic results in just four weeks or less of targeted applications. It merges bio-technology with beauty, resulting in a laser-free “lift” and a marked improvement to skin. Give your hands the legendary ReVive Glow – now and in the future.

LUMINOUS RESULTS:

- Strengthens your skin, increasing the appearance of skin density and elasticity, while returning fullness, firmness and tone to hands.
- Reduces the look of age spots and discoloration while leaving you with an irresistible glow.
- Renew the appearance of skin, visibly reversing the look of thin, crepey, aging skin on the hands.

Price: \$500

Size: 4 vials (each vial is 5.00 ML / 0.16 FL OZ)

Where: Available exclusively at Sccube the Apothecary #05-25 Ngee Ann City

RéVive

RESEARCH. RENEWAL. RESULTS.

Application:

- Apply at night to cleansed, dry hands.
- Apply two to three drops onto hands, gently massaging into fingers, palms and back of hands and up onto forearms. Use no other products simultaneously on the hand area.
- Use one vial per week for 4 continuous weeks to coincide with your skin's natural renewal cycle.
- Use twice a year to promote skin's renewal process and give your hands the legendary RéVive glow – now and in the future.
- For daily maintenance use Fermitif Hand Renewal Cream (Launching November 2013) every day.

ABOUT RÉVIVE

This haute couture skincare range uses a unique ingredient — the Nobel-prize winning Epidermal Growth Factor or EGF. Working on a molecular level, EGF creates dynamic and fast moving cell activity so that youthful and dewy skin is achieved after only a few weeks. It also works faster on damaged or aged skin.

Created by Dr Gregory Bays Brown, a plastic and reconstructive surgeon and Nobel- prize-winning scientist, RéVive is a range of intensive skincare products that work to literally reverse the effects of time. It has already won a legion of fans among celebrities such as Sarah Jessica Parker, Hilary Rodham-Clinton and Kate Hudson.

SCCUBE THE APOTHECARY

Sccube the Apothecary is a unique retail concept that offers the most chic and innovative beauty and skin care treatments available today. Sccube the Apothecary represents an integration of innovative Science, Style and je ne sais quois, and a belief that every Soul is as individual and unique as each selected brand. The company is Singapore's sole retailer of several international cult brands, many of which have foundations in the scientific field. These include dr. brandt, Philip B., ReVive, Rodial and Visoanska.

Sccube The Apothecary also offers skin analysis and personalised facial spa treatments such as signature Visolift and Madonna Rejuvenation Facial by Intraceuticals.
